Contact Sandy 02 67797665

SPRINGSIDE SIMMENTALS

Peter and Toni Rauchle of Springside Simmentals have been breeding Simmentals in Qld since 1975. Over the years the Simmental has proven itself to manage change to suit the Australian climate

For the 2017 Tenterfield Euro Sale, Springside Simmentals has assembled a draught of 10 polled heifers. These all share a soft, smooth coat, are quiet natured and come from dams that have produced exceptional offspring constantly, some for well over a decade.

If you're looking for quality heifers with different genetics for your herd look at our line-up at the Tenterfield Euro Sale.

DOUBLE K SIMMENTALS

Double K Simmental's are very proud to present our young Sire prospect Double K Langer. He is a modern free moving young bull who is still surprising us with his quietness and easy doing. Structural correctness is very important for us, Langer represents all the things we love about the Simmental breed. He comes from a fantastic milking female who is a quiet and easy calving cow. Langer is a low birth weight bull and has grown out well on only a small amount of supplements and pasture. He is Pesti tested negative and Pesti guard vac. 7 in 1 4/6/17. A great young bull that will be an asset to any herd.

SIXPENCE PARK SIMMENTALS

Sixpence Park offer 2 black bulls, 1 traditional bull and 2 females for this sale. All bulls have an outstanding temperament. We have nominated Sixpence Park Linda's Boy and Sixpence Park Miranda for the 2017 Brisbane EKKA show

Miranda is one of our best heifers.

She is a very easy doing, quiet feminine heifer with great length. Last year's show cow's calf, winning many supreme exhibits. This heifer was 530kg at 13 months.

All Sixpence Park cattle are VAC: 7in1, Pestiguard & Piliguard vaccinated 3 germ BDJ status J8

CLAIRVIEW SIMMENTALS

Clairview Simmentals is located near Armidale and has only been established since 2014. With one black cow from St Pauls Genetics and a black bull from Circle 8. We then reinstated three Barana and three Clay Gully traditional cows from our commercial herd and purchased Noanga Hampster. We have recently increased our herd genetics with females purchased from Valley Creek, Wormbete and Billa Park. We aim to produce large framed, well-muscled bulls that will produce large framed efficient cows that in turn produce calves suitable for domestic trade or feedlot entry at 9 to 10 months.

We offer Lot 4: CLAIRVIEW MADU. The first ever registered son of the great CHANTRY SUGAR RAY to be offered for sale. At the Tamworth Simmental feature show in 1994, attended by Chantry, Dunmore, Langton Gate, Monreied and others, the judge said of

Sugar Ray,

"I've had a look around, and although he is the best bull here, he's black, so he can't be judged as a Simmental." WOW! Times have changed.

This is probably the only time we will offer the immediate offspring of Sugar Ray. We intend to use the remaining semen sparingly to produce bulls for our own use.

Lots 9 & 10: CLAIRVIEW MERLIN & CLARIVIEW MAJOR. A rare opportunity to acquire some of the breeds best genetics from the past. SV Bavarian over a Beat cow. Both bulls are true to type, well muscled, walk well and have great style.

MERLIN, medium red/dark tan, a well grown bull with great temperament. MAJOR, a lovely red bull, nice and long, with great hooding over the eyes. A shame he is missing goggles.

Lots 11 & 12: CLAIRVIEW LEVI & CLAIRVIEW LEO. Two nice long, smooth, well muscled and free moving bulls. LEVI, dark red and polled. LEO, light tan/blonde with small (almost non existent) scurrs.
