Lucrana History

The stud was registered in 1986. The family having used Simmentals in the commercial herd for a number of years. Being impressed by the extra growth and muscling of Simmental cross progeny, as well as the maternal ability of the Simmental blood females, it was decided to purchase some stud females. A diverse group of foundation females was put together over the next few years. Today the breeding herd is run under what could be considered as tough commercial conditions.

Numerous natural service and A.I sires from the breeds leading bloodlines and herds have been added over the years.

In the early days of the stud the calves that were retained as bulls were destined for the Moore family's commercial crossbred breeding herd. As numbers grew, bulls were sold both privately and at various multivendor sales, in Toowoomba, Rockhampton, Wandoan, Casino, and Roma.

By 2012 the herd was of sufficient size to sustain our own annual sale, and the decision was made to hold our First On Property Sale.

In 2016 we embarked on a Black Simmental breeding program with the purchase of foundation females from the St Pauls herd, and look forward developing this new division in the future.

Welcome to Lucrana Simmentals 7th On Property Sale

The past year has been a great one for Lucrana genetics. With our clients experiencing wonderful commercial and stud sale success. While in the show ring our genetics have also featured, of note was the outstanding achievement of Meldon Park Simmental Stud claiming the Interbreed Champion Bull with a Lucrana sired animal at Beef 2018 in Rockhampton.

At the time of putting this years sale catalogue together the Lucrana stud females have commenced calving under what are the toughest of seasonal conditions, but continue to do an admirable job on their calves. Thus underlining one of the major strengths of the breed being it's maternal ability.

We are extremely happy with the direction our new sire lines introduced via AI and natural service are taking the herd. This year's sale bulls are probably the most robust and powerful group we have offered but most importantly they also retain softness.

We thoroughly recommend this year's sale draft to you and look forward to catching up on July 6.

Comments:
 Stud sire potential. This young bull offers Black Simmental breeders the potential to maintain size and performance in their cattle without sacrificing eye appeal. Although only an October drop calf, M369 possesses outstanding weight for age, softness and great carcass attributes. His freedom of movement, neck extension and head carriage combine to create a sire's outlook. Homozygous Black by pedigree.

Comments:
 Full sister to Lots 1, 11 & 27. The Dimension/Elsa mating really clicks, as can be seen by her brothers earlier in the catalogue. This is a heifer we have a lot of time for and it is with a great deal of reluctance that we have catalogued her, but as always our policy is to only offer top end stud females for sale. Our loss is your gain. Entered for this year's RNA, and can be exhibited at the vendors expense if the successful purchaser wishes to do so, with delivery to take place after the show.
