Important Information

Inspections

The **Simmental** sale bulls will be available for inspection on Wednesday 12th February 2020 from 12 noon (SA time) and the **Angus** sale bulls will be available for inspection on Monday 17th February 2020 from 9am (SA time) with complimentary refreshments available at the sales to all visitors.

A supplementary sheet will be supplied at the sale including current weights and scrotal measurements.

Transport

Complimentary transport is available within South Australia, Victoria, New South Wales and southern Queensland and can be arranged upon request.

Guarantee

Yerwal Estate guarantees the structural integrity and fertility of all of its sale bulls. The entry of every bull constitutes a guarantee by the Vendor that the bull will be replaced or the purchase price* refunded if a bull proves totally infertile within the first 12 months from the date of purchase.

Please note that NO foot trimming is ever carried out at Yerwal Estate.

* Without interest, expenses, costs and damages.

Health Status

Yerwal Estate is John's Beef Assurance Score (J-BAS) accredited and has a score of J-BAS 7. All bulls were tested free of pestivirus and have been vaccinated with Ultravac 7in1, Pestigard and Vibrovax.

Scan Data

All sale bulls have been scanned by Mr Max Bowman who is an accredited scanner; Accreditation # 1026.

Buyers Registrations

Buyers are required to register with the selling agents prior to the commencement of the sale and to display their registration numbers at the fall of the hammer.

Sale Conditions

Conditions of sale by auction in South Australia apply. All sale lots are sold exclusive of GST. Please contact your selling agents to arrange phone bidding.

Agent Rebate

A 3% rebate is offered for outside agents if prospects are introduced to the selling agents in writing at least 24 hours prior to the sale.

Disclaimer

Every effort has been taken to ensure that the information in this Sale Catalogue is correct at the time of publication. All reasonable care has been taken in its preparation however no responsibility is taken for any inadvertent errors or omissions.

Understanding Estimated Breeding Values (EBVs)

BIRTH		
Calving Ease Direct	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers. Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age. Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf. Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth. Lower EBVs indicate lighter birth weight.
GROWTH		
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth. Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age. Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age. Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age. Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam. Higher EBVs indicate heavier live weight.
FERTILITY		
Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age. Higher EBVs indicate larger scrotal circumference.
CARCASS		
Carcass Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age. Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass. Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass. Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the PB rump site in a 400 kg carcass. Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass. Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass. Higher EBVs indicate more intramuscular fat.

FEED EFFICIENCY		
Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase. Lower EBVs indicate more feed efficiency.
TEMPERAMENT		
Dockility	%	Genetic differences between animals in temperament. Higher EBVs indicate better temperament.
STRUCTURE		
Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel). Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw). Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel). Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind. Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side. Higher EBVs indicate more desirable structure.
SELECTION INDEXES		
Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture growers/stewers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets. Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Higher selection index values indicate greater profitability.
