Sale Information

BIDDING

All bidding will take place on AuctionsPlus. Prospective bidders and purchasers must register with AuctionsPlus, or contact their local agent before the commencement of the sale.

REGISTRATION

All cattle are sold as herdbook registered and are eligible for transfer at vendor's expense. Please advise transfer details on your registration of buyer's number.

TRANSFERS

All animals sold must be transferred within thirty days of the sale to the purchaser. It is the vendor's responsibility to have any bulls sold to a current Stud member, DNA typed, and sire verified at point of transfer.

BUYING ORDERS & PHONE LINKUP

A person nominated by you to act on your behalf will diligently execute buying orders. Bidding by mobile phone will be available.

CONTACT

John Setttee 0408 297 368

INSURANCE

Insurance is recommended and will be available on sale day through attending representatives.

REBATE

A 1% rebate is to be paid to outside registered agents attending with and settling on behalf of their clients within 7 days of receipt of invoice.

GST

All bids are made on the understanding they are exclusive of GST, that is GST is to be added to all prices gained on the day. Health Status: J-BAS status is shown for every lot indicating the Bovine Johnes status of sale animals. At all times intending purchasers should consult with their local LLS District Veterinarian for health conditions applying for importing livestock into the district and crossing state borders.

EMBRYO LOTS

All Embryos must be collected before sale date. 4 embryos constitute 1 lot of any joining to sire and or dam. Vendor to guarantee 50% conception if done by mutually agreed technician between vendor & purchaser. Lots are to be offered on a per embryo basis. A copy of the flush sheet indicating the freezing technique must also be included with the entry form. Both the sire and the dam used in a flush to produce embryos for sale must be Red coated animals (R.A.S.A) and Herdbook registered.

WARRANTIES:

1. Females catalogued as unjoined are warranted fertile to natural service within 12 months of date of sale; the purchaser is to have the right to a full refund of the purchase price of the female (excluding any costs and expenses of the purchaser) on submitting a veterinary report after the expiration of 12 months to the effect that the purchaser has been unable to get the female in calf to natural service. The veterinarian must state that in his/her opinion there is no evidence that the female suffered any injury or illness since being sold to the purchaser, which could have affected her breeding ability. The veterinarian must also state that in his/her opinion there is no evidence that the female has been subjected to embryo transfer procedures. The veterinary report (together with a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct) must be forwarded to the vendor within 14 days of the first anniversary of the sale date.

2. Bulls under 14 months must be sold as being able to serve and settle after reaching 14 months of age. The buyer is expected to provide reasonable care and feeding. Should the bull prove to be a nonbreeder, the buyer shall notify the seller within four months after the bull reaches 14 months of age. The seller shall then have six months to prove the bull to be a breeder. In no case shall the buyer be responsible for more than the selling price. Any issues arising from the sale of the younger cattle will not be the responsibility of the sale committee or either society. Bulls over 14 months in

the National Sale are to be sold as fertile and capable of natural service. The purchaser is to have the right to a full refund of the purchase price of the bull (excluding any costs and expenses of the purchase) within 3 months of the date of the sale subject to submitting a veterinarians' report stating that the bull is infertile or incapable of natural service. The veterinarian must also state that in his/her opinion that bull has not suffered any injury or illness since being sold to the purchaser, which could have affected his breeding ability. The veterinary report (together with the Statutory Declaration by the purchaser to the effect that the substance of the report is believed by the purchaser to be true and correct) must be forwarded to the vendor within 14 days of the date being three months after the sale date. All bulls have passed a semen test and passed a Veterinary Inspection within four weeks of the sale.

REFUND RESPONSIBILITY

The responsibility to refunds based on conditions warranties lies with a particular vendor(s) of the lot(s). While the agents will assist in facilitating a refund if all conditions are met, the agents are not responsible for providing the refund regardless of the vendor's situation.

DISCLAIMER

All reasonable care has been taken by the breed societies and the designer to ensure information is correct at the time of publication, however we take no responsibility for the accuracy, reliability or the use of this.

Explanatory Breedplan Notes

USING BREEDPLAN INFORMATION TO PURCHASE SUPERIOR CATTLE

BREEDPLAN allows the objective measurement of beef cattle to be transformed into estimates of genetic merit called Estimated Breeding Values (EBVs). EBVs should be used in conjunction with other selection tools like bull breeding soundness exams and structural assessments. The methodology behind BREEDPLAN has been around since the 1950's and has been continuously developed since then. BREEDPLAN itself has been around for almost 40 years and is used by 100+ breed associations in 15 countries. It is a proven technology with extensive scientific research and knowledge behind it.

HOW TO USE EBVS TO SELECT ANIMALS

It is important to note that the Red Angus and Simmental GROUP BREEDPLAN EBVs contained in this catalogue can only currently be used within each breed and cannot be used to compare across the breeds.

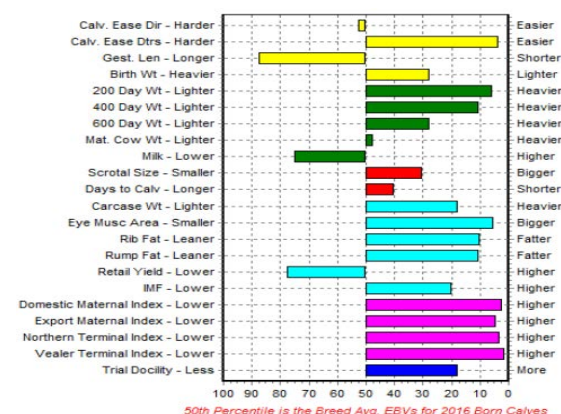

Percentile Band	600 Day Wt (kg)
Top Value	+107
Top 1%	+84
Top 5%	+71
Top 10%	+64
Top 15%	+60
Top 20%	+56
Top 25%	+53
Top 30%	+49
Top 35%	+47
Top 40%	+44
Top 45%	+42
Top 50%	+39

EBVs are expressed in the units of measurement for each particular trait. They are shown as positive or negative differences between an individual animal's genetics and the genetic base to which the animal is compared. For example, a bull with a 600-Day Weight EBV of +50 kg is 9 kg above a breed average of 39kg. This means that his progeny would be expected to be 5.5 kg (11 kg ÷ 2 as half the genetics come from the cow) heavier than the progeny of a breed average bull.

The breed average can also be found in the percentile tables (Top 50% line). These tables can be used to evaluate where each animal ranks within the breed for each EBV trait. For example, a +50 kg bull would rank

in the top 30 % of the breed for the 600 Day Weight EBV.

Another useful tool is the EBV percentile graph which can be found on the BREEDPLAN Website. It is available by clicking on the graph symbol at the top left of EBV table for any animal. The EBV percentile graph shows which percentile band each animal is in for each trait. For most EBVs, it is desirable to have bars tending to the right-hand side of the graph, though there are exceptions (e.g. Mature Cow Weight) where moderate or the left

hand side of the graph may be preferable. The bars are also colour coded with calving traits being yellow, growth traits green, fertility traits red, carcass traits light blue, other traits dark blue and selection indexes pink.

The Mating Predictor on the BREEDPLAN website can be used to predict the parent average EBVs of the potential offspring from any potential matings. This can be useful when contemplating what potential progeny you might get from purchasing a cow or bull and mating to animals you already have access to. The Mating Predictor can be found at the top of the animal search page of the each breeds BREEDPLAN search web page.

When using EBVs to assist in selection decisions, it is important to place emphasis on those traits that are important to the particular markets and environment the bull is to be used in. Not all EBVs are relevant to each production system and, for some, a low or a moderate EBV may be more valuable than a high EBV. Selection indexes (described later in article) take the hard work out by balancing the combination of EBVs available.

EBVS PUBLISHED BY BREEDPLAN

EBVs are published for a range of traits covering fertility, calving ease, growth, milking ability and carcass merit. The published EBVs are:

- Calving Ease Direct – more positive EBVs are favourable and indicate that 2 year old cows will have less difficulty birthing the progeny of this bull.
- Calving Ease Daughters - more positive EBVs are favourable and indicate easier calving of a sire's daughters at two years of age.
- Gestation Length - lower (negative) EBVs indicate shorter gestation which is associated with lower birth weights and easier calving.
- Birth Weight – lower EBV indicate lighter calves at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers or poorer calving cows of other breeds.
- 200, 400 & 600 Day Growth EBVs – more positive EBVs indicate faster growth to 200, 400 & 600 days of age, respectively.
- Mature Cow Weight EBV – indicates the size of the mature cow and thus how much feed she requires each year. Low to moderate EBVs are generally more favourable in self replacing or maternal production systems.
- Milk EBV - is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, on the 200-day weights of her calves.
- Scrotal Size EBV – more positive EBVs indicate better semen quality and quantity in males and younger age of puberty in females.
- Days to Calving EBV – more negative EBVs indicate a shorter interval from bull-in date to calving and therefore higher cow fertility. This EBV is not

currently available in the Red Angus analysis.

- Carcass Weight EBV – more positive EBVs indicate a heavier carcass weight at 650 days of age.
- Eye Muscle Area EBV – more positive EBVs indicate larger eye muscle area and therefore higher retail beef yields.
- Rib and Rump Fat EBVs – more positive EBVs indicate more subcutaneous fat and earlier maturity.
- Retail Beef Yield EBVs – more positive EBVs indicate higher yielding carcasses.
- Intramuscular Fat EBVs – more positive EBVs indicate higher levels of intramuscular fat and better MSA grading scores.
- Docility EBV - more positive EBVs indicates a higher proportion of progeny with acceptable temperament. This EBV is not currently available in the Red Angus analysis.

EBV ACCURACY AND TRAITS OBSERVED

Percentage accuracies are presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The actual traits observed for each animal can also be viewed when the animal is searched on the BREEDPLAN website. The higher the accuracy %, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

In general, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs, the animal with higher accuracy could be the safer choice, assuming other factors (e.g. structure) are equal.

SELECTION INDEXES

Ranking animals on their Selection Index value sorts them based on their progeny's expected profitability for the targeted production system. This takes the confusion out of looking at all of the EBVs and deciding how important each is to your farming system. Australian selection indexes rank animals based on their net profitability per cow joined.

RED ANGUS SELECTION INDEX DESCRIPTION

SUPERMARKET – Estimates the genetic differences between animals for a herd targeting the domestic supermarket trade and retaining daughters for breeding.

VEALER – Estimates the genetic differences between animals for a herd targeting vealer production and retaining daughters for breeding.

NORTHERN STEER – Estimates the genetic differences between animals for a herd in Northern Australia with Bos indicus cows targeting grass finished steers for export.

For more detail on the Red Angus Selection indexes, go to

<http://breedplan.une.edu.au/tips/Interpreting%20Australian%20Red%20Angus%20Selection%20Indexes.pdf>

SIMMENTAL SELECTION INDEX DESCRIPTIONS

DOMESTIC MATERNAL INDEX - Estimates the genetic differences between animals for a herd in Southern Australia (e.g. Angus cows) targeting the domestic supermarket trade and retaining daughters for breeding.

EXPORT MATERNAL INDEX - Estimates the genetic differences between animals for herd in Southern Australia (e.g. Angus cows) targeting the export trade and retaining daughters for breeding.

NORTHERN TERMINAL INDEX - Estimates the genetic differences between animals for a herd in Northern Australia (e.g. Brahman cows) targeting the export trade.

VEALER TERMINAL INDEX - Estimates the genetic differences between animals for a herd in Southern Australia (e.g. Angus cows) targeting the vealer trade.

AuctionsPlus®

Australia's Livestock Marketplace

Can't make the sale?

Purchase online in eight simple steps!

Log on to AuctionsPlus and bid on your phone, tablet or computer.

- 1 REGISTER ONLINE**
Free once off registration for all auctions.
- 2 COMPLETE BUYER INDUCTION**
The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.
- 3 VIEW CATALOGUE**
View photos, videos, pedigrees and more.
- 4 ENTER AUCTION**
Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.
- 5 AUTO BID**
Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.
- 6 CONTACT SELLING AGENT**
If successful, contact selling agent to arrange payment and delivery. The agent contact details will be available in the catalogue header.
- 7 PAYMENT**
Via the selling agent's terms and conditions.
- 8 DELIVERY**
Arrange transport of livestock at your expense.

P7 is a long bodied, sound sire. He has been running with heifers and cows and has a great nature. His Dam is and exception cow that has consistently produced soft, easy doing females and bulls, P7 is a great example of this. P7 is a paternal brother to the 2018 Red Angus National Champion Bull, exhibiting the same thickness, dark colour and structural soundness. P7 will suit any herd, packing plenty of performance to put into a commercial herd but also the presence and appeal to suit a stud stock operation.

This young sire is a good commercially focused bull to go out into the industry and suit any commercial operation. He's a bull with a power of meat, depth and length and carries himself well with good feet and is structurally sound. His Dam was the Donation heifer at the National in 2017 and was purchased for our two boys Isaac and Henry by their Grandparents David & Ashleigh. This is their first of many bulls to be sold. 7in1, vibrio and Pestiguard Vaccinated.

Poseidon is a strong young bull who follows in the footsteps of his father and grandfather which strong structure, feet and sire appeal. He is suitable for cows or second time calvers. Poseidon has a quiet temperament, and is very approachable as he was raised in the arena of school grounds where he was handled weekly by students. Poseidon has been to many local QLD shows in 2019 and performed well. He will be a great asset to any cattle operation. He has been blooded, 7in1, Pesti neg (+ vaccinated) other treatment up-to-date.

This young bull is by far the best bull bred by us to date. His length coupled with his a depth of rib and lower thigh sees him weigh in at 939 kgs at 20 months of age. He scanned well with 19 and 10 mm fats and 124 EMA and an excellent raw data scan of 6.7 for IMF. He is an easy moving correct young bull with tremendous sire appeal and natural thickness and the ability to lay a good cover of fat down which the industry needs with our move to a grass fed product. Sired by the breed legend RRAV20 and out of a beautiful Six Mile Game Face daughter going back to another breed legend in Towaw Indeed he will produce a class line of progeny with beautiful udders. RETAINING full possession and selling a HALF share semen rights and marketing rights in this great young sire. If you require more information please do not hesitate to call.

Quintin is a high muscle and growth young bull. Genetically gifted with a small birth weight and high growth from both parental lines (Andras New Direction/Lazy MC Trooper). He would be well suited as a heifer bull for commercial or stud purposes. He has a great quite temperament and was raised on a small farm with lots of interaction. In February 2020 just at 12 Months of age he was awarded Grand Champion Red Angus and Reserve Champion British Breeds at Bell Show QLD.

Loaderry Prince is a bull with tremendous length and power. He is deep bodied with great muscle expression. Prince is structurally correct and sound making him a must for those looking to add efficiency traits into their herd. His structure, depth, smooth muscle pattern and width across his top line are to be admired. He is well made with an appealing sire outlook.

GBL Ponoka has been a stand out for us from the beginning. With a calving ease birthweight and an excellent disposition this outcross sire is out of Heaven Sent 30X and by LFE Commissioner, the 2014 high selling bull at Lewis Farms for \$31,000. 30X has been a go to donor cow at Lewis Farms proving that no matter the mating she can produce great quality calves. Commissioner has laid a foundation of producing some high selling productive bulls and females all across North America and with his current owner, Rust Mountain View. We will be selling this bull with 10 doses of semen and we will also be keeping some in herd use semen as well. Semen stored at Molong, NSW.

This sire has powerhouse written all over him. With his top ranking 200/400 day weight he will absolutely produce quality calves that will weigh down the scale. His dam, LFE Charo 98W is no stranger to Australia with Woonallee Simmental's producing some top end bulls and females over the last few years. His sire is much the same, Full Throttle has been a solid go to bull in both Australia and Canada for a plethora of breeders.

This is another one that will be hard to part with. She is a clean fronted, growthy stylish heifer with a great future in front of her. With Canyon, Robin Hood and Hi HO in the back ground and Game Face as well, this heifer is bred to breed. Top 5% for 600 day growth. Joined to DAHM002 1.11.119 to 1.2.20. Vaccinated for 7.1 and Pestivirus.

This deep bodied heifer is a little smaller in frame than her sisters. She is a easy doing heifer in the top 5% for 600 day and scanned very well for IMF at 7.2 raw data scan. It's funny when you dig deep into genetics and go back, this heifer has a cow way back M17 who was a awesome cow in her time. Ironically DAHP012 also has her there as well. Top 10 % for 600 day. Joined to DAHM002 1.11.19 to 1.2.20. Vaccinated 7.1 and Pestivirus.

VALLEY CREEK ANGEL
PERT LUCKY ONE A19
PERT LUCKY ONE A19(E257)
PERT BLKSIM Z16

February born baldy and definitely one that holds her own amongst the heifers. This red baldy is easy to appreciate, good feet and udder development in a very docile temperament. The presence Q002 carries is unlike any other as is so attractive through her front end with a beautiful head. Angel is backed by both sire and dam that are both Sydney Royal Show Champion Winners. Potential cow/calf pair for feature breed 2022. Angel will be AI'd to our new exclusive AI Sire plus sells with 1 straw of semen to BGS/BM Captain Scream 63D.

Another lovely maiden heifer bred down from a tremendous line of show cows. She is a moderate framed heifer, that shows great potential for capacity and growth. Her mother is one of my favourite cows in the herd and Grand Dam was 3rd in her class at the World Congress in Melbourne as a cow with a calf at foot. You can't go wrong with this addition. Has had 7in1 booster AD&E and a B12 injection in April and will be drenched again prior to sale.

The 2019 national grand champion Red Angus bull at the Fort Worth Stock Show. We saw PTO at Agribition in 2018 and loved the thickness and soundness of this bull. He has a lot of power and performance but gets out there and moves. PTO is breeding well in the states and Canada with his son, L83 2Strong 13F named reserve grand champion bull to PTO at Fort Worth. Minimal release of semen in 2020 so get your hands on this sire while you can.

Selling 2 packs of 25 straws and are kept at Hobbs Livestock. We think very highly of this bull and will be keeping him to herd breed however we think his genetics are absolutely worth sharing. He's long bodied with good foot and leg structure and a front end built for calving ease. He is out of the breeding masterpiece LFE 621Y who is part of the Sheila cow family. 621Y is now 10 years old, has 15 registered calves under her name and this year is fully supporting 2 natural twins, we cannot say enough good things about her as a dam!

DCR MR MOON SHINE X102 X BULLANDO SAPPHIRE N002

VENDOR: BULLANDO SIMMENTALS

DOB:

TATTOO:

Bullando Sapphire N02 x DCR Mr moonshine X102 - 4 embryos guarantee of 50%. Sapphire N02 was our show heifer for 2018/19, She has an outstanding temperament and great overall structure. With calf at foot, we are super impressed with what N02 is capable to produce. We decided to cross her with Mr Moonshine who is a proven sire within our herd. This can be seen through all daughters (Savannah Zoes), we are excited to see what this cross does.

Purchaser:

Price:

LOT 90

ERIXON PIT BOSS 21Z/MRL PREDESTINED 63B X SAVANNAH ZOE M02

VENDOR: BULLANDO SIMMENTALS

DOB:

TATTOO:

As Savannah Zoe M02 has constantly achieved very high results with her previous flushing, this year we decided to flush to two sires. (Pitboss 22Z/ Predestined 63B). This was done to ensure a successful program as in the past she has provided us with such high numbers, as well as having the opportunity to experiment with Predestined as a new AI sire.. We are super excited and privileged to own and be able to flush a cow with such great genetics. M02 is the full sister to Savannah Zoe M04 that topped the 2018 national sale for \$28,000, as well as Savannah Zoe M01 who was the top price female for the 2017 national sale. M02 has been a proven flusher in our program, with 60 embryos in the last three flushes.

Purchaser:

Price:

LOT 91

ERIXON PIT BOSS 21Z/MRL PREDESTINED 63B X SAVANNAH ZOE P042

VENDOR: BULLANDO SIMMENTALS

DOB:

TATTOO:

Savannah Zoe P042 x Erixon Pit Boss 21Z/MRL Predestined 63B 4 embryos guarantee of 50%. As the calf at foot of M02 (lot -) Savannah P042 has turned out to be as good as her Mother and some even say better, this heifer was added into the embryo program as a late addition, due to only being 16 months when flushed, to our surprise she had a great result. We are super excited to see how this heifer grows and develops and are sure that she will continue to not disappoint, this is a great opportunity to get your hands on. P042 was also flushed to two sires, (Pitboss 22Z/Predestined 63B).

Purchaser:

Price:

LOT 92

RC CLUB KING 040R X ST PAULS TANKER'S LUCY K435

VENDOR: ST PAUL'S GENETICS

DOB:

TATTOO:

Both sire and dam are tested Homo Black and Homo Polled. K435s Grand Dam 594R was a stunning cow that had performance plus and was the highest performing heifer of her contemporary group at Lucas Cattle Co Missouri. K435s dam E431 was the pick of her group, she sold to Lucrana in 2016. E431 has progeny in 4 herds. K435 follows the style and class of her maternal line and is in the top five cows at St Pauls. This mating will offer style and power. The mating predictor says top 10% in CE Dau; 200 day growth; and \$ Indexes. In fact 11 traits are in the top 30% offering a great balance of EBVs.

Purchaser:

Price:

LOT 93

HOOK'S YELLOWSTONE 97Y X ST PAULS CC G430 PEAR M412

VENDOR: ST PAUL'S GENETICS

DOB:

TATTOO:

Sire and dam are both Homo black and homo polled. M412 is the best M series female at St Pauls, her first calf, a bull sired by Yellowstone topped the performance of his group as well as being phenotypically the pick bull of the group. M412s second calf by Nukara, a heifer, is a corks and destined to be a breeder in the herd. M412s dam G430 was the standout of her year, we turned down a couple of offers but in 2016 she sold to Lucrana. G430s first heifer was successfully shown at Sydney Royal 2105. M412s grand dam D270 has been a lynch pin in the herd and her dam is the prolific cow Miss Prickly Pear 615F. The mating to Yellowstone, is the same as her first calf. The EBV package is truly exciting with 10 traits in the top 20% including CE, Bwt, 200day, SS, Fats, IMF and all \$ Indexes.

Purchaser:

Price:

Both Sires (SRS Right On and TNT Tanker and Dam St Pauls CC D270 Pear M415 are all tested Homo Black and Homo Polled. M415, first bull calf sold to seedstock duties. M415s dam is D270. D270s son by Dew it Right won Canberra Champion Male and res champion at Sydney Royal 2014. D270 and her USA dam Miss Prickly Pear 615F have been a lynch pin in the St Pauls program. The mating to Tanker offers EBVs that have 8 traits in the top 10% including 200 and 400 day, CE Dau, CWT, and all \$ Indexes and the mating to Right On offers superb carcass EBVs with top 5% for IMF and Fats and top 10% EMA and top 25% 400 day; Both sires offer added maternal, thickness and capacity to a great maternal cow family line that has breed royal Champions. For those that can't decide on which sire then take a couple embryos of each.
