OUR PHILOSOPHY

Topweight and Seven Brooks aim to breed animals that are docile, fertile and easy doing. With a large focus on herd health and pasture management we are able to achieve optimal growth whilst maintaining a grass fed diet. Having our herds graze on quality mixed crops throughout the year our herds have achieved exceptional growth whilst improving the land and soil as a whole. We aim to breed bulls that are early maturing, docile, mobile and fertile and it is this package that has given us and our clients great growth and longevity of both the bull itself and offspring. At Topweight we invite anyone to come view our cattle.

These bulls have grown up together from grass grown on the property and have been selected from over 50 bull calves with culling started at day one. The whole herd is treated in the same way with commercial principals at the forefront. At Topweight our main focus is on birthweight, feet, temperament ,type and fertility all taking a part in the animals selection for sale or breeding purposes. We believe and fully back our 100% grass fed bulls will work for you.

Healthcare: All bulls have been vaccinated with both injections of 7in1, pestiguard, vibrovax and drenched with eprinex. They have passed there BVDV test and semen morphology test. They have also had a marksmin mineral injection.

**We welcome and encourage anyone to come and view our bulls on the property at any point.
Please contact Sam.**

1

T30

Comments: This bull has grown into a very complete poll bull in our eyes. He has great thickness and extraordinary muscle shape and very tidy through the shoulders. He has great markings and deep cherry red colour and is one of the most docile bulls in this group. His mother P57 is a very powerful high capacity cow who always stands out in the herd.

Comments: This bull is packed full of muscle from head to tail weighing 518kg at 290days. depth, width and great feet shape . He is no slouch on the ebvs either being above average for most traits. He moves very freely and is from a great old cow L160 they don't stay around that long for no reason. a sire sure to improve your herd.

T40

Comments: A very well marked long , smooth muscled and moderate framed bull with great feet and legs and a doc-ile temperament to match. At only 34kgs born he has good calving ease and birthweight EBVS while still being above average for growth. He has been one of the favourites the whole way though and I am certain he will grow into one of the best bulls in this drop.

T126

Comments: This poll bull is smooth shouldered, carrying a lot of width down his topline and into his hind quarters. He is very well muscled on his rump and down to his flank with good scan data of 4.9 IMF. He is the youngest bull in the sale with a great temperament and huge potential.

S34

Comments: The first 2 year old and what a cracker he is. This bull has an exceptionally long soft muscled body complemented by his very docile nature and classic simmental markings. His EBVS mostly in the top 10% and higher and his scan data matches up with 125cm EMA, 8mm rib and rump and a IMF of 5.9. He will stamp his calves just like his dam (M23) has done for us. She is an elite cow within the herd.

HEIFERS- PICK OF PEN

We are excited to offer "pick of the pen" from our yearling heifer mob!

We have carefully selected 17 of our favourite heifers that we believe are true to type, easy doing and docile and out of Topweight's most proven dams.

These heifers truly are some of the best we have bred. Sires include Topweight M073, Topweight R170, Mubarn Pablo's Pride and Willandra Maverick.

Heifers can not be viewed on sale day however viewing prior is encouraged. Please contact Sam Weightman on: 0427 593 095.

Check out our Facebook page at Topweight Simmentals for all our updates leading up to sale day.

These are the following heifers that will be up for auction:

TOPPT89	TOPPT079	TOPPT20
TOPPT93	TOPPT142	TOPPT131
TOPPT031	TOPPT069	TOPPT086
TOPPT085	TOPPT004	TOPPT013

BRINGING HOME YOUR YEARLING BULL

**TOPWEIGHT
SIMMENTALS**

Congratulations on purchasing your new Topweight Simmental sire!

We have some simple tips to help prevent injury or loss of condition of your bull and to ensure you and your new bull work well for each other.

Although all steps have been taken to choose docile cattle, we strongly suggest before unloading your bull from the truck that you ensure you have at least a couple of cows or steers in the yards ready for his arrival. These bulls are used to being in a mob, and typically only having one person working with them. By ensuring he is not unloaded alone will enable them to acclimatise to their new environment with minimal stress.

Your new yearling bull will cover 25 cows with ease in a single sire mob. At the conclusion of mating, it is important to look after your yearling bull as they are still maturing. If paddocked with senior bulls, it may impact their ability to access adequate feed, which in turn will stunt their growth. At Topweight, we suggest paddocking them separately or alternatively running them with a mob of steers.

At Topweight we believe customer satisfaction is imperative and wish to be the first point of contact for any questions or concerns regarding your new purchase. Please call Sam - 0427 593 095

We really hope your new bull works well for you.
