Simmental Opportunity Sale 2023

INTRODUCTION

The Australian Simmental Breeders Association is pleased to present the first Simmental Opportunity Sale. The Simmental Opportunity Sale has developed from the Simmental National, held in previous years. The sale aims to offer purchasers the opportunity to purchase outstanding Simmental genetics which suit their breeding programs. Simmental Breeders are progressive, with proven investment into genetics which suit the Australian cattle industry. The Simmental breed is diverse, and this year's sale offering provides the opportunity for purchasers to find cattle to suit their preferences. Simmental cattle provide a commercial advantage, with increased weight, maternal characteristics, and performance. The cattle offered in this year's sale will suit both stud and commercial markets.

The sale will run as a simultaneous auction on AuctionsPlus. All cattle have been videoed, and these videos can be viewed via AuctionsPlus. Cattle submitted into the sale must be verified for soundness, health, and fertility by a vet.

We encourage you to contact either the selling agent Nutrien Ag Solutions (John Settree, phone 0408 297 368) or the vendors for more information.

Thank you for your interest in the 2023 Simmental Opportunity Sale.

ASBA Sale Committee

SALE INFORMATION

BIDDING

All bidding will take place on AuctionsPlus and commence at 1.00pm AEST Friday 16th June 2023, running as a timeout simultaneous auction. Please contact: John Setttee on 0408 297 368 (Dubbo) or Tim Woodham 0436 015 115 (Wagga Wagga), if you are unsure of the process. Prospective bidders and purchasers must register with AuctionsPlus.

TRANSFERS

All sale cattle are registered with Simmental Australia and are eligible for transfer at vendor's expense. Please advise the vendor all transfer details within thirty days of the sale, for the eligible transfer to occur. It is the vendor's responsibility to have any bulls sold to a current Stud member, DNA typed, and sire verified at point of transfer.

INSURANCE

It is recommended insuring your purchases at the fall of the hammer/timer. Please contact a Nutrien Insurance representative or your own representative prior to the sale.

All cattle are at the purchaser's risk from the fall of the hammer/timer.

REBATE

An outside agent rebate of 1% is to be offered by all vendors and is to be deducted from proceeds on a pro-rata basis. This will occur providing the outside agents nominate prospective purchasers in writing to Nutrien Ag Solutions 24hrs prior to the sale.

Settlement with selling agents must occur 7 days from the date of the sale.

GST

All lots are sold exclusive of GST and will be added to all prices gained on the day.

HEALTH STATUS

At all times intending purchasers should consult with their local LLS District Veterinarian for health conditions applying for importing livestock into the district and crossing state borders.

EMBRYO/FLUSH/SEMEN LOTS

All Embryo lots must be collected before sale date. 4 embryos constitute 1 lot of any joining to sire and or dam. Vendor to guarantee 50% conception if done by mutually agreed technician between vendor & purchaser. Lots are to be offered on a per embryo/flush basis.

A copy of the flush sheet indicating the freezing technique must also be included with the entry form. Both the sire and the dam used in a flush to produce embryos or a flush for sale must be Herdbook registered.

Semen to be sold on per straw basis.

WARRANTIES

1. Females catalogued as unjoined are warranted fertile to natural service within 12 months of date of sale; the purchaser is to have the right to a full refund of the purchase price of the female (excluding any costs and expenses of the purchaser) on submitting a veterinary report after the

expiration of 12 months to the effect that the purchaser has been unable to get the female in calf to natural service.

The veterinarian must state that in his/her opinion there is no evidence that the female suffered any injury or illness since being sold to the purchaser, which could have affected her breeding ability. The veterinarian must also state that in his/her opinion there is no evidence that the female has been subjected to embryo transfer procedures. The veterinary report (together with a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct) must be forwarded to the vendor within 14 days of the first anniversary of the sale date.

2. Bulls under 14 months must be sold as being able to serve and settle after reaching 14 months of age. The buyer is expected to provide reasonable care and feeding. Should the bull prove to be a non-breeder, the buyer shall notify the seller within four months after the bull reaches 14 months of age. The seller shall then have six months to prove the bull to be a breeder. In no case shall the buyer be responsible for more than the selling price. Any issues arising from the sale of the younger cattle will not be the responsibility of the Breed Society or committee. Bulls over 14 months in the National Sale are to be sold as fertile and capable of natural service. The purchaser is to have the right to a full refund of the purchase price of the bull (excluding any costs and expenses of the purchase) within 3 months of the date of the sale subject to submitting a veterinarians' report stating that the bull is infertile or incapable of natural service. The veterinarian must also state that in his/her opinion that bull has not suffered any injury or illness since being sold to the purchaser, which could have affected his breeding ability. The veterinary report (together with the Statutory Declaration by the purchaser to the effect that the substance of the report is believed by the purchaser to be true and correct) must be forwarded to the vendor within 14 days of the date being three months after the sale date.

All bulls have passed a semen test and passed a Veterinary Inspection within four weeks of the sale.

REFUND RESPONSIBILITY

The responsibility to refunds based on conditions warranties lies with a particular vendor(s) of the lot(s). While the agents will assist in facilitating a refund if all conditions are met, the agents, Breed Society or committee are not responsible for providing the refund regardless of the vendor's situation.

DISCLAIMER

All reasonable care has been taken by the breed society, designer and vendor (s) to ensure information is correct at the time of publication. However, Simmental Australia and the designer take no responsibility for the accuracy, reliability or the use of this. Any claims must be made in writing to the vendor within 3 months of the sale. Simmental Australia and the designer take no responsibility for animals being infertile or incapable of natural service including the use of embryos, semen and flushes of animals.

EPD INFORMATION

The Simmental Opportunity Sale is one of the first sales in 2023 with the introduction of the IGS performance recording system for Simmental cattle. IGS is the world's largest animal performance recording system.

One of the major changes is the breeding figures being reported as Estimate Progeny Differences (EPDs), rather than Estimated Breeding Values (EBVs). The difference between the two is simple.

Effectively, an EBV is an animal's own genetic value for a particular trait. However, the animal can only pass half of this onto their progeny. EPDs have the "half" already accounted for. That is, an EPD is the genetic merit of an animal's progeny – what they will pass onto their progeny.

IGS can incorporate an animal's genomics into its performance data. All animals in the Simmental Opportunity sale have been 100K GGP-LD DNA profiled.

Simmental - Traditional, Fullblood and Simbrah Register Breed Average

	CED	BW	WW	YW	MILK	MCE	MWWT	STAY	DOC	CW	REA	FAT	MARB	YG	API	TI

Polled and Coat Color Information:

PP - Homo Polled - the bull carries two copies of the polled gene

Homo Polled Homo Polled 100% Polled
 Hetero Polled 100% Polled
 Horned 100% Polled

Pp - Hetero Polled - the bull carries one polled gene and one horned gene

Hetero Polled Homo Polled 100% Polled
 Hetero Polled 75% Polled, 25% Horned
 Horned 50% Polled, 50% Horned

Homo Black - the bull carries two copies of the black gene

Homo Black Homo Black 100% Black

Hetero Black 100% Black
 Red 100% Black

Hetero Black - the bull is black in color, but carries one black gene and one red gene. Black is dominant to red, so the red color is not expressed when it is paired with a black gene.

Hetero Black Homo Black 100% Black
 Hetero Black 75% Black, 25% Red
 Red 50% Black, 50% Red

Red - the bull carries two copies of the red gene. This example assumes the bull is diluter free.

Red Homo Black 100% Black
 Hetero Black 75% Black, 25% Red
 Red 100% Red

Notes: A bull that we have come to know and love here at our stud. Excellent phenotype that will pack a punch in any operation. With backing from the Jarravale and Tennysonvale genetics which have worked well in our herd. 3 germ, Vibrio, 3 day, Pesti-guard. Was Supreme Simmental Exhibit at the 2023 Sydney Royal Show. Retaining 100 straws for in-herd use.

Notes: S007 is a quality Homo Polled/Homo Black, soft, easy doing bull with plenty of length and body. Style has a sleek effortless motion and can cover ground smoothly. He has had a vaccination program of 7-1, pestigard, vibriovax, multimin and will be tick vaccinated before the sale. Striking Style's dam, Lancaster Strike K176 is highly regarded as a proven breeder of quality offspring since winning Supreme Female Simmental Champion at the Sydney Royal in 2017. His Sire, MRL Missile 138c has impressed us with his progeny growing with incredible depth, weight gain and temperment.

Notes: 10 straws - An opportunity to secure semen in our current herd sire. A long, well-muscled bull with outstanding confirmation and reproductively sound. Very quiet temperament with beautiful pigment, a bull that phenotypically has it all! Match this with his pedigree, which includes the super cow Woonallee Kathie B111 along with his EPDs completing the package. His calves are impressive, ranging from 37-43kg birthweight, born unassisted. Photos of progeny available at request. Heterozygous polled. Top 1% Milk, Top 4% MWWT, Top 10% Stayability, Top 20% Birthweight, Top 25% Fat, Top 30% WW, YW, Doc, Top 35% API, TI, CW.

\$70 per board game, discount available for 10 games

**Orders to Felicity at Simmental Australia
P. 0488 062 287 E. office@simmental.com.au**

CROSS BREEDING WITH SIMMENTAL

Simmental
AUSTRALIA

- A major role for the Simmental breed is its use in crossbreeding programs.
- Simmental x British or Bos Indicus calves gain weight 10% to 20% faster, reaching market weight younger and earlier, reducing annual stocking pressure.
- Crossbreeding with Simmental produces significant productivity gains due to hybrid vigour and to the additive traits derived from the Simmental breed.
- When combined, these gains generally boost overall productivity by 10% to 20% in the Simbeef F1 (first cross) animal and by 20% to 25% where the Simbeef F1 female is used as a breeder.
- Simmentals may be used in either "Terminal" or "Rotational" crossbreeding programs.
- Crossbred cows stay in the herd 3.1 years longer and produce 20% more weaning weight over the lifetime of the cow than their straight bred counterparts. Source USDA Mark.
- Simmental composites simplify crossbreeding, maintain uniformity and achieve optimum levels of heterosis.

The next level in performance
