

How to request DNA online through CGEN

Log in through Breeder Login

Go to My Lab Test Requests

Scroll to the bottom and click ADD

Your next screen should look like the one below:

Add Animal

Animal ID:

Barcode #(TSU,Hair):

Load Animals From File

No file chosen

[Sample_Lab_Test_Animal_Import_List_Template](#)

* Instructions:

* Add Animals: Add the animals you wish to test. You may enter multiple animals but they must all be requesting the same test with the same options. !!If requesting parentage please ensure the Sire and Dams have already been profiled or their samples are sent at the same time!!

* Select The Test: Select the test you require from the dropdown menu and set the extended options

* Create The Test Requests: To create the test requests click the Create Test Button Once. The test requests will be created

Click Create Test

Your submission will go to the Genetic Hub staff for completion and you'll receive a batch number and paperwork to send with your samples to Neogen.
