Sire Reference

Lucrana Legend (P)

A sire that has really suited what we do with our program. He breeds sleek skinned, moderately framed animals with loads of meat. They're soft and fleshy and are super correct on feet and legs. His daughters are functional, good uddered and fertile. He was purchased for \$32,000 and has been our most successful outside blood sire we have used over the past 10 years.

Karragarra Quantum Leap

Selected from our 2021 sale draft, by Wayne's brother and co-op breeder – Luke York, to use over his portion of Billa Park cows. A powerhouse of a bull with the most unreal skin. Expect to see natural meat, performance, weight-for-age and clean coats in his son's.

Casa Toro Riverland (P)

When we first saw Riverland we knew he was the bull for us. He has that natural sleek hair type we chase as well as a powerful body and outlook. The strength of his female line also sealed it for us going back to the great old Billa Park D25 cow. His progeny are clean coated and long with good structure.

Karragarra Rambo (P)

Used as a yearling and he has bred terrific. Sold for \$45,000 to the Hack family from Alpha. Super long and thick with great soundness. He has delivered with some neatly made sons that have his strong carcass attributes.

Sire Reference

Karragarra Queenslander

Well they don't make bulls this deep, soft and full of meat very often. Originally sold as top price at our 2021 sale we regained possession after the new owners lost their agistment country. We couldn't be happier he returned home. His sons are square made, soft, full of meat and have outstanding feet. His daughters are loose hided and we can't wait to see what they deliver.

Glenanna Superstar (PP)

Purchased as a yearling bull for \$28,000. He was a complete outcross, but is a similar type to the bulls we breed. He has fitted straight in and is doing a good job. A long soft and correct made bull who is clean coated and quiet as a mouse.

Karragarra Sanchez (P)

Our retained Nanango son on a moderate frame. A real eye-catching powerhouse that is as thick as you can get. His first calves haven't disappointed. They're thick and beefy with real in the paddock doing ability – full of soft beef they have sleek coats and loose hides.

Billa Park Club (P)

A powerful bull with real carcass and grunt. He is a larger framed High Impact son that really throws his muscle and body type onto his sons. Extra muscle in the hindquarters and added thickness.

Billa Park Blaze (P)

The last of the Billa Park sires we have in our sire battery. A super loose and soft bull with great bone. His daughters are just hitting production, and that looseness of skin and milking is evident. Always a prolific worker. Expect added fat cover and high IMF in his son's without compromising on EMA.

Ticoba 1390 (P)

A large framed, heavy boned, full red coloured Simbrah bull. Selected to put a bit of lift in some lower framed cows. His calves are drop dead quiet and have heaps of depth.

Sire Reference

Tennysonvale Rasper (PP)

Selected for his correct structure, moderate muscle and outcross bloodlines. We have used him on our first calving heifers with great success. Calves are born small and grow quickly. We recommend his progeny for use on heifers.

Lakeside Steward (P)

Selected for use over heifers. Glossy skinned bull with good shape and neck extension. He injured himself early in his first season.

Black Simmental Sires

Charmana Riptide (PP)

Used as an AI sire - he offers extra growth and bone that's hard to find in the blacks. He has a good hair type and loads of soft fleshing that can be seen in his sons.

Woonallee GenTen S552 (PP)

A middle of the road black bull that carries himself well. His progeny have a good middle of the road muscle pattern with neck extension and length of body.

These first three bulls were halter broken by the kids in the 2024 July school holidays, so the bets are on as to who's bull will make the most. But WOW... this bloke will be hard to beat. He is Monty's and could be the best bull in the sale. A back end with so much natural thickness and power. Long bodied with a great head. A ripper of a bull – if his genetics weren't so close to a lot of our herd, he would have been retained.
